Compare institutions

Choose two or three institutions to compare documented activity across the same dimensions. Coverage differs; counts are not rankings.

A shared agreement retains one record ID and can appear in several institution columns. A missing entry means no documented record in this view; it does not establish no activity. “Owned / operated” is a broad category: inspect the source for each institution’s actual role.

Evidence for this view

Partial public-source inventory checked Oct 20, 2026. Reader 2026-10-21.1. 18 documented records. Counts do not measure investment, patient volume or market share.

View filters: institution=Johns+Hopkins+Medicine+International&institution=Mass+General+Brigham&institution=Dana-Farber+Cancer+Institute&view=list. Dataset SHA-256: ba7dc894be8227b395cda67bfbb8e5432ab6445db5082d24b02b5b5379bd44fd.

1. **IHB-0037 · Johns Hopkins provides clinical-operations consulting to Bermuda Hospitals Board.**

   Johns Hopkins Medicine International · Bermuda Hospitals Board · Bermuda · Consulting / advisory · Status not established

   Latest event: Not stated. Source checked: Oct 20, 2026. Associated facility: Not applicable.

   Current status is not established. Inclusion in the initial inventory does not establish ongoing operation.

   Pre-existing relationship listed by the linked primary source as checked on 2026-10-20. Baseline is an inventory category, not a claim about the original start date or facility operating status.

   Current official active-project listing and project page describe stroke, rehabilitation and psychiatric care operational work.

   Analysis: Operational expertise can extend market presence through local partners. Assess the scope of the engagement before treating it as ownership or direct hospital management.

   https://www.hopkinsmedicine.org/international/health-care-consulting/americas/bermuda-hospitals-board

2. **IHB-0038 · Johns Hopkins supports a Bermuda insurer’s population-health program.**

   Johns Hopkins Medicine International · Bermuda Life Insurance / Argus Insurance Company · Bermuda · Insurer Partnership · Status not established

   Latest event: Not stated. Source checked: Oct 20, 2026. Associated facility: Not applicable.

   Current status is not established. Inclusion in the initial inventory does not establish ongoing operation.

   Pre-existing relationship listed by the linked primary source as checked on 2026-10-20. Baseline is an inventory category, not a claim about the original start date or facility operating status.

   Current active-project listing and project page describe development and implementation of a population-health program, including chronic disease services; not merely data sharing.

   Analysis: Operational expertise can extend market presence through local partners. Assess the scope of the engagement before treating it as ownership or direct hospital management.

   https://www.hopkinsmedicine.org/international/health-care-consulting/americas/bermuda-life-insurance

3. ### IHB-0039 · Johns Hopkins supports clinical-program development at Fundación Santa Fe de Bogotá.

   Johns Hopkins Medicine International · Fundación Santa Fe de Bogotá · Colombia · Consulting / advisory · Status not established

   Latest event: Not stated. Source checked: Oct 20, 2026. Associated facility: Not applicable.

   Current status is not established. Inclusion in the initial inventory does not establish ongoing operation.

   Pre-existing relationship listed by the linked primary source as checked on 2026-10-20. Baseline is an inventory category, not a claim about the original start date or facility operating status.

   Active-project listing and project page describe clinical-program and service expansion consulting and stroke care work.

   Analysis: Operational expertise can extend market presence through local partners. Assess the scope of the engagement before treating it as ownership or direct hospital management.

   https://www.hopkinsmedicine.org/international/health-care-consulting/americas/fundacion-santafe-de-bogota

4. ### IHB-0040 · Johns Hopkins supports clinical care and patient-safety operations at Hospital Moinhos de Vento.

   Johns Hopkins Medicine International · Hospital Moinhos de Vento · Brazil · Consulting / advisory · Status not established

   Latest event: Not stated. Source checked: Oct 20, 2026. Associated facility: Not applicable.

   Current status is not established. Inclusion in the initial inventory does not establish ongoing operation.

   Pre-existing relationship listed by the linked primary source as checked on 2026-10-20. Baseline is an inventory category, not a claim about the original start date or facility operating status.

   Current active-project listing and project page describe a hospital consulting partnership with clinical case discussions and sustained unit-based safety programs.

   Analysis: Operational expertise can extend market presence through local partners. Assess the scope of the engagement before treating it as ownership or direct hospital management.

   https://www.hopkinsmedicine.org/international/health-care-consulting/americas/hospital-moinhos-de-vento

5. ### IHB-0041 · Johns Hopkins supports stroke and pediatric emergency care at Pacífica Salud.

   Johns Hopkins Medicine International · Pacífica Salud Hospital Punta Pacífica and Hospital Costa del Este · Panama · Consulting / advisory · Status not established

   Latest event: Not stated. Source checked: Oct 20, 2026. Associated facility: Not applicable.

   Current status is not established. Inclusion in the initial inventory does not establish ongoing operation.

   Pre-existing relationship listed by the linked primary source as checked on 2026-10-20. Baseline is an inventory category, not a claim about the original start date or facility operating status.

   Current active-project listing and project page describe clinical-service development, operational efficiency and pediatric emergency care work. No new opening date asserted.

   Analysis: Operational expertise can extend market presence through local partners. Assess the scope of the engagement before treating it as ownership or direct hospital management.

   https://www.hopkinsmedicine.org/international/health-care-consulting/americas/hospital-punta-pacifica

6. ## IHB-0042 · Johns Hopkins supports clinical quality and care processes at American International Hospital in Vietnam.

   Johns Hopkins Medicine International · American International Hospital · Vietnam · Consulting / advisory · Status not established

   Latest event: Not stated. Source checked: Oct 20, 2026. Associated facility: Not applicable.

   Current status is not established. Inclusion in the initial inventory does not establish ongoing operation.

   Pre-existing relationship listed by the linked primary source as checked on 2026-10-20. Baseline is an inventory category, not a claim about the original start date or facility operating status.

   Official AIH release dated April 12 2025 identifies ongoing Hopkins collaboration in clinical quality and patient safety; body names Vietnam and provides Ho Chi Minh City address. Separate December5 2022 release confirms Dec4 2022 long-term renewal. Hopkins current active-project page also explicitly identifies Vietnam, but its external partner hyperlink is erroneous.

   Analysis: Operational expertise can extend market presence through local partners. Assess the scope of the engagement before treating it as ownership or direct hospital management.

   https://aih.com.vn/en/tin-tuc/the-american-international-hospital-johns-hopkins-medicine-international-strengthening-collaboration-for-premium-healthcare

7. ## IHB-0043 · Johns Hopkins advises Shalamar on developing a comprehensive women’s health center.

   Johns Hopkins Medicine International · Shalamar Institute of Health Sciences · Pakistan · Consulting / advisory · Status not established

   Latest event: Not stated. Source checked: Oct 20, 2026. Associated facility: Not applicable.

   Current status is not established. Inclusion in the initial inventory does not establish ongoing operation.

   Pre-existing relationship listed by the linked primary source as checked on 2026-10-20. Baseline is an inventory category, not a claim about the original start date or facility operating status.

   Official project page states a signed consulting agreement to establish a center within Shalamar Hospital in the Lahore area; no opening claimed.

   Analysis: Operational expertise can extend market presence through local partners. Assess the scope of the engagement before treating it as ownership or direct hospital management.

   https://www.hopkinsmedicine.org/international/health-care-consulting/asia-pacific/shalamar-institute-health-sciences

8. ## IHB-0044 · Johns Hopkins continues consulting and clinical-program collaboration with Anadolu Medical Center.

   Johns Hopkins Medicine International · Anadolu Medical Center · Turkey · Consulting / advisory · Status not established

   Latest event: Not stated. Source checked: Oct 20, 2026. Associated facility: Not applicable.

   Current status is not established. Inclusion in the initial inventory does not establish ongoing operation.

   Pre-existing relationship listed by the linked primary source as checked on 2026-10-20. Baseline is an inventory category, not a claim about the original start date or facility operating status.

   Current project page explicitly states ongoing work following hospital construction and an affiliation agreement focused on clinical quality, patient safety and program development.

   Analysis: Operational expertise can extend market presence through local partners. Assess the scope of the engagement before treating it as ownership or direct hospital management.

   https://www.hopkinsmedicine.org/international/health-care-consulting/emea/anadolu-medical-center

9. ## IHB-0045 · Johns Hopkins collaborates with Clemenceau Medical Center in Beirut.

   Johns Hopkins Medicine International · Clemenceau Medical Center · Lebanon · Consulting / advisory · Status not established

   Latest event: Not stated. Source checked: Oct 20, 2026. Associated facility: Not applicable.

   Current status is not established. Inclusion in the initial inventory does not establish ongoing operation.

   Pre-existing relationship listed by the linked primary source as checked on 2026-10-20. Baseline is an inventory category, not a claim about the original start date or facility operating status.

   Active-project listing and current project page describe affiliation plus hospital development, patient experience and quality/risk assessment support.

   Analysis: Operational expertise can extend market presence through local partners. Assess the scope of the engagement before treating it as ownership or direct hospital management.

   https://www.hopkinsmedicine.org/international/health-care-consulting/emea/clemenceau-medical-center

10. ## IHB-0046 · Johns Hopkins supports development and oversight for Clemenceau's Dubai facility.

    Johns Hopkins Medicine International · Clemenceau Medicine International · United Arab Emirates · Consulting / advisory · Status not established

    Latest event: Not stated. Source checked: Oct 20, 2026. Associated facility: Not applicable.

    Current status is not established. Inclusion in the initial inventory does not establish ongoing operation.

    Pre-existing relationship listed by the linked primary source as checked on 2026-10-20. Baseline is an inventory category, not a claim about the original start date or facility operating status.

    Current project page identifies CMI facilities in Dubai and Riyadh and says Hopkins provides oversight, development and training services. Facility operational status not inferred.

    Analysis: Operational expertise can extend market presence through local partners. Assess the scope of the engagement before treating it as ownership or direct hospital management.

    https://www.hopkinsmedicine.org/international/health-care-consulting/emea/clemenceau-medicine-international

11. ## IHB-0047 · Johns Hopkins supports development and oversight for Clemenceau's Riyadh facility.

    Johns Hopkins Medicine International · Clemenceau Medicine International · Saudi Arabia · Consulting / advisory · Status not established

    Latest event: Not stated. Source checked: Oct 20, 2026. Associated facility: Not applicable.

    Current status is not established. Inclusion in the initial inventory does not establish ongoing operation.

    Pre-existing relationship listed by the linked primary source as checked on 2026-10-20. Baseline is an inventory category, not a claim about the original start date or facility operating status.

    Same multicountry engagement as UAE record, split by country as methodology permits. Current source supports oversight, development and training; no operation or management contract claimed.

    Analysis: Operational expertise can extend market presence through local partners. Assess the scope of the engagement before treating it as ownership or direct hospital management.

    https://www.hopkinsmedicine.org/international/health-care-consulting/emea/clemenceau-medicine-international

12. ## IHB-0048 · Johns Hopkins and Saudi Aramco maintain an integrated healthcare joint venture.

    Johns Hopkins Medicine International · Saudi Aramco / Johns Hopkins Aramco Healthcare · Saudi Arabia · Joint venture · Status not established

    Latest event: Not stated. Source checked: Oct 20, 2026. Associated facility: Not applicable.

    Current status is not established. Inclusion in the initial inventory does not establish ongoing operation.

    Pre-existing relationship listed by the linked primary source as checked on 2026-10-20. Baseline is an inventory category, not a claim about the original start date or facility operating status.

    Official page states the partners launched JHAH in 2014 and describes an integrated health organization with clinical programs and operational improvements; exact original dates not supplied.

    Analysis: Operational expertise can extend market presence through local partners. Assess the scope of the engagement before treating it as ownership or direct hospital management.

    https://www.hopkinsmedicine.org/international/health-care-consulting/emea/johns-hopkins-aramco-healthcare

13. ## IHB-0051 · Jiahui's Shanghai hospital maintains a clinical collaboration with Massachusetts General Hospital.

    Mass General Brigham · Jiahui Health / Jiahui International Hospital · China · Strategic partnership · Status not established

    Latest event: Not stated. Source checked: Oct 20, 2026. Associated facility: Not applicable.

    Current status is not established. Inclusion in the initial inventory does not establish ongoing operation.

    Pre-existing relationship listed by the linked primary source as checked on 2026-10-20. Baseline is an inventory category, not a claim about the original start date or facility operating status.

    Current official partner about page identifies collaboration with Massachusetts General Hospital and joint appointments for leadership physicians. Tracked at parent-system level; no new date, equity interest or management contract claimed.

    Analysis: A clinical partnership creates market presence without a wholly owned hospital. Compare clinical integration with other approaches to entering China.

    https://jicc.jiahui.com/en_US/about/2.html

14. ## IHB-0080 · Dana-Farber announces academic-advisory collaboration with OncoClinic in Saudi Arabia

    Dana-Farber Cancer Institute · OncoClinic · Saudi Arabia · Consulting / advisory · Announced

    Latest event: Feb 5, 2026. Source checked: Oct 20, 2026. Associated facility: Planned.

    Dana-Farber is an academic advisor, not an equity owner of OncoClinic. The release uses future tense for the first Riyadh facility and does not prove it was open. Advisory announcement falls within the twelve-month history window.

    Primary February 5, 2026 release announces the collaboration and identifies strategic-planning and clinical-program-development advice.

    Analysis: Oncology advisory partnerships can extend specialist methods into a major patient-source market. Strategists should distinguish advisory participation from equity ownership or hospital management.

    https://www.dana-farber.org/newsroom/news-releases/2026/dana-farber-collaboration-with-oncoclinic-a-joint-venture-between-al-faisaliah-group-and-oncoclinicasco-will-bring-world-class-oncology-to-saudi-arabia

    https://www.dana-farber.org/about/collaborations

15. ## IHB-0081 · MGB and Dana-Farber advise BEEAH on Jawaher Boston Medical District

Mass General Brigham; Dana-Farber Cancer Institute · BEEAH Group / Jawaher Boston Medical District · United Arab Emirates · Consulting / advisory · Status not established

Latest event: May 12, 2023. Source checked: Oct 20, 2026. Associated facility: Planned.

Current status is not established. Inclusion in the initial inventory does not establish ongoing operation.

Shared deal: one record across both tracked institutions. Baseline records a pre-existing development/advisory relationship; no facility-opening claim.

May 2023 release describes an advisory collaboration for a planned Sharjah healthcare system and flagship hospital.

Analysis: A shared advisory arrangement can bring multiple US specialties into one overseas development. Its competitive significance depends on execution, so a planned system should not be treated as open.

https://www.dana-farber.org/newsroom/news-releases/2023/mass-general-brigham-and-dana-farber-cancer-institute-collaborating-with-beeah-group-to-advise-on-a-new-patient-centered-health-care-system

https://www.dana-farber.org/about/collaborations

16. ## IHB-0082 · Dana-Farber's Health City collaboration combines oncology support and referral coordination

Dana-Farber Cancer Institute · Health City Cayman Islands · Cayman Islands · Strategic partnership · Status not established

Latest event: Oct 31, 2023. Source checked: Oct 20, 2026. Associated facility: Not applicable.

Current status is not established. Inclusion in the initial inventory does not establish ongoing operation.

Current Dana-Farber collaborations page continues to list Health City.

Release describes peer review of complex oncology cases, clinician programs and a coordinated complex-cancer referral process.

Analysis: Specialty partnerships can link local case discussion with a pathway for complex referrals. That combination can be commercially relevant even without an owned overseas site.

https://www.dana-farber.org/newsroom/news-releases/2023/dana-farber-cancer-institute-announces-collaboration-with-health-city-cayman-islands

https://www.dana-farber.org/about/collaborations

17. ## IHB-0083 · Dana-Farber participates in Bermuda radiation-care alliance

Dana-Farber Cancer Institute · Bermuda Cancer and Health Centre · Bermuda · Strategic partnership · Status not established

Latest event: Not stated. Source checked: Oct 20, 2026. Associated facility: Not applicable.

Current status is not established. Inclusion in the initial inventory does not establish ongoing operation.

The source does not provide an exact publication or alliance-start date.

The partner's 2026 guide describes its radiation alliance with Dana-Farber Brigham Cancer Center and treatment protocols delivered in Bermuda.

Analysis: An in-country treatment partnership can meet needs that would otherwise require travel. Such relationships can support a US program's influence while changing the mix of outbound referrals.

https://www.cancer.bm/the-hub/centre-news/cancer-care-in-bermuda-a-guide-for-new-and-soon-to-be-residents-2026

https://www.dana-farber.org/about/collaborations

18. ## IHB-0084 · Dana-Farber’s Sun Yat-sen collaboration includes specialty development and telemedicine

Dana-Farber Cancer Institute · First Affiliated Hospital, Sun Yat-sen University · China · Strategic partnership · Status not established

Latest event: Not stated. Source checked: Oct 20, 2026. Associated facility: Not applicable.

Current status is not established. Inclusion in the initial inventory does not establish ongoing operation.

No exact February 2021 signing day inferred. Record is the operational clinical relationship, not the symposium.

Official university report describes a partnership since February 2021 with specialty advancement and telemedicine; Dana-Farber’s current page lists the relationship.

Analysis: A named clinical collaboration can connect specialist expertise to an overseas institution. Its role should be assessed separately from associated conferences and research.

https://www.sysu.edu.cn/sysuen/info/2961/47391.htm

https://www.dana-farber.org/about/collaborations
